Dear NSW Government,

I strongly believe in the right of people to share their houses and apartments across New South Wales in a responsible and respectful way, without extreme regulations like caps and costly registration processes. Please accept this as a formal submission to the Options Paper.

Why do I host with Airbnb?

The Airbnb host community depends on hosting as an economic lifeline to help us pay the mortgage and the bills. I also recommend my favourite cafes, restaurants and shops so small businesses get a boost from local tourism.

I wish to support the following options:

Section 4: Industry Self Regulation - including industry complaints management and education which encourages responsible hosting and self regulation. Any Code of Conduct would need to be reasonable and representative of the home sharing community.
Section 5: Strata Regulation - This includes options for by-laws to manage visitor behaviour and to receive a revenue share from home sharing. I would also support rules to deal with bad actors and isolated incidents of unruly behaviour. I would not support a regulatory environment which allowed Owners Corporations to ban outright short term rentals.

I wish to register my opposition to the following options:

Section 6: Planning Framework - A planning framework including caps and restrictions would have a negative impact on home sharing. The planning frameworks in both South Australia and Tasmania don’t include any caps on nights at all.
Section 7: Registration or Licensing - A registration or licensing system such as fees to share your own home would have a negative impact on home sharing. In South Australia there are no fees and no registration or licensing system, allowing the home sharing economy to thrive. In Tasmania, there is a simple, quick and cost effective self-assessment form, which is only required in limited circumstances - usually for holiday homes or weekenders only.
Section 5: Strata Regulation - By-laws which could prohibit hosts from sharing their own homes would see strata residents treated as second class citizens. Current rules in NSW do not allow by-laws that ban hosts from sharing their own home, and this would be a step backwards for NSW.

To maximise participation in the sharing economy, any regulations should be clear and easy to understand and comply with, and also cost effective for hosts.

I encourage the NSW Government to follow the lead of South Australia and Tasmania, as well as other cities around the world, which have embraced home sharing and are reaping the rewards.

Dear NSW Government,

As a guest who has travelled to NSW using the Airbnb platform in the past 12 months, I strongly believe in the right of people to share their houses and apartments. I absolutely embrace my responsibilities as a guest to treat hosts’ homes in a responsible and respectful way, and I know that Airbnb’s review system keeps hosts and guests accountable for their travelling behaviours.

Extreme regulations, and red tape like caps and costly registration processes could severely affect my ability to travel using Airbnb and restrict my choices as a traveller. Please accept this as a formal submission to the Options Paper.

Why do I travel to NSW using Airbnb?

Local hosts make valuable recommendations of their favourite cafes, restaurants and shops so that small businesses get a boost from local tourism, with a ripple effect of supporting jobs in these communities.

I wish to support the following options:

Section 4: Industry Self Regulation - including industry complaints management and education which encourages responsible hosting and self regulation. Any Code of Conduct would need to be reasonable and representative of the home sharing community.

Section 5: Strata Regulation - This includes options for by-laws to manage visitor behaviour and to receive a revenue share from home sharing. I would also support rules to deal with bad actors and isolated incidents of unruly behaviour. I would not support a regulatory environment which allows Owners Corporations to ban outright short term rentals.

I wish to register my opposition to the following options:

Section 5: Strata Regulation - By-laws which could prohibit hosts from sharing their own homes would see strata residents treated as second class citizens. Current rules in NSW do not allow by-laws that ban hosts from sharing their own home, and any change to this would be a step backwards for NSW.

Section 6: Planning Framework - A planning framework including caps and restrictions would have a negative impact on home sharing. The planning frameworks in both South Australia and Tasmania don’t include any caps on nights at all.

Section 7: Registration or Licensing - A registration or licensing system to share your own home would have a negative impact on home sharing. In South Australia there are no fees and no registration or licensing system, allowing the home sharing economy to thrive. In Tasmania, most home sharing requires no approvals. For others there is a simple, quick and cost effective self-assessment form, which is only required in limited circumstances - usually for holiday homes or weekenders only.

To maximise participation in the sharing economy, any regulations should be clear and easy to understand and comply with, and also cost effective for hosts.

I encourage the NSW Government to follow the lead of South Australia and Tasmania, as well as other cities around the world, which have embraced home sharing and are reaping the rewards.
I understand as an Airbnb citizen that problems are occurring in congested cities and apartments being used for short term rent instead of proper housing. But regulating the market in this fashion for all properties in NSW, even those outside the CBD I feel is definitely not the way to go on this issue.

Domenic Zattrra

Dear Sir,

I own an apartment in the CBD of Sydney with very good views of the Opera House and the Harbour Bridge.

This apartment would be a very good candidate for high end STHL.

Unfortunately the Owners Corporation has taken a strong stance against STHL and has lobbied the State Government against any changes.

I and a considerable number of owners welcome STHL as it adds flexibility to the use of our property. I and they are in the minority in the building.

I would like to be able to let out my property for a minimum of 1-2 weeks so that there is not too much turnover for myself and the building.

I would employ an agent to take care of the entry and exit of short term tenants minimizing the work required by building staff.

I also propose to charge STHL customers considerable deposits to dissuade these tenants from causing damage to my and common property and causing other issues that the owners that do not want STHL worry about. Like excessive noise etc.

I think it is not beyond the wit of man to come up with a scheme that accommodates the needs, wishes and rights of both camps.

My building currently allows stays of 3 months minimum. The people who stay for 3 months are not likely to be too much different to people who stay 2 weeks.

The reasons the people who stay 3 months behave themselves are same as the ones who stay 2 weeks.

A well thought out set of rules will overcome most problems.

There will be some people who do not follow the rules, but they are generally in a small minority in all sets of people no matter what the situation is.

It seems a great pity that the concerns that a few people may not follow the rules has restricted what would be a great boost to the tourism economy of the state.

I hope the committee that makes the final decision takes into account the needs and rights of both sides of this policy debate and comes up with a balanced approach that we can all live with.

Thank you for your time.

Kindest Regards

Peter Gregory

I wish to register my opposition to the following options:

Section 6: Planning Framework - A planning framework including caps and restrictions would have a negative impact on home sharing. The planning frameworks in both South Australia and Tasmania don’t include any caps on nights at all.
Section 7: Registration or Licensing - A registration or licensing system such as fees to share your own home would have a negative impact on home sharing. In South Australia there are no fees and no registration or licensing system, allowing the home sharing economy to thrive. In Tasmania, there is a simple, quick and cost effective self-assessment form, which is only required in limited circumstances - usually for holiday homes or weekenders only.
Section 5: Strata Regulation - By-laws which could prohibit hosts from sharing their own homes would see strata residents treated as second class citizens. Current rules in NSW do not allow by-laws that ban hosts from sharing their own home, and this would be a step backwards for NSW.

To maximise participation in the sharing economy, any regulations should be clear and easy to understand and comply with, and also cost effective for hosts.

I encourage the NSW Government to follow the lead of South Australia and Tasmania, as well as other cities around the world, which have embraced home sharing and are reaping the rewards.

Anne Stovin

Dear NSW Government,

I strongly believe in the right of people to share their houses and apartments across New South Wales in a responsible and respectful way, without extreme regulations like caps and costly registration processes. Please accept this as a formal submission to the Options Paper.

Why do I host with Airbnb?

The Airbnb host community depends on hosting as an economic lifeline to help us pay the mortgage and the bills. I also recommend my favourite cafes, restaurants and shops so small businesses get a boost from local tourism. Helps promote regions suffering from natural disasters. Word of mouth about tiny towns people would never visit unless they have been informed about them. This is beneficial for towns not on the coastal fringes.

I wish to support the following options:

Section 4: Industry Self Regulation - including industry complaints management and education which encourages responsible hosting and self regulation. Any Code of Conduct would need to be reasonable and representative of the home sharing community.
Section 5: Strata Regulation - This includes options for by-laws to manage visitor behaviour and to receive a revenue share from home sharing. I would also support rules to deal with bad actors and isolated incidents of unruly behaviour. I would not support a regulatory environment which allowed Owners Corporations to ban outright short term rentals.

I wish to register my opposition to the following options:

Section 6: Planning Framework - A planning framework including caps and restrictions would have a negative impact on home sharing. The planning frameworks in both South Australia and Tasmania don’t include any caps on nights at all.
Section 7: Registration or Licensing - A registration or licensing system such as fees to share your own home would have a negative impact on home sharing. Why do I host with Airbnb?
We have a two story house, the top level is a fully furnished 3 bedroom house that enables people to stay in affordable family accommodation, at the moment we have a lady who is from the Northern Territory and is receiving chemo and radiation treatment for breast cancer, our home allows her to live independently close to her treatment centres and makes it easy for her family to support her, (her family lives over an hour away and is to far for our guest to drive each day while undergoing treatment). she likes the fact that is a family home and she feels comfortable here. She would not be able to find similar accommodation in the Hotel or Motel environment and she would be unable to afford to stay in hotel accommodation for an extended period of time.

We cater for families and having three children ourselves know how hard and expensive it is to find suitable accommodation.

We live near to a shopping mall, cinemas and hotels and our guests have all used these facilities while staying here.

The Airbnb host community depends on hosting as an economic lifeline to help us pay the mortgage and the bills. I also recommend my favourite cafes, restaurants and shops so small businesses get a boost from local tourism.

I wish to support the following options:

I have a holiday rental in popular Port Stephens. This is a studio which sleeps max 2 guests. When the Real Estate could not find a suitable, permanent tenant, I started to holiday let in 2013.

I use Airbnb and Stayz to list my property. Both these online systems allow a modest price to be placed on nightly stays, allowing me to be competitive with other accommodation, e.g. hotel or holiday cabins in the area. Payment is made directly to Airbnb or Stayz and they provide annual rental income which is used for tax income declaration.

Airbnb offers a far superior service to Stayz as hosts are able to provide feedback on guests, not just properties. Guest feedback allows property owners to gain insight into the person, before they are allowed to stay. This is essential for selecting guests that will respect the neighbours and abide by house rules, including keeping noise to minimum, providing adequate facilities for waste and recycling, having off street parking provision and including safety information and evacuation plan, in the event of an emergency.

The current self regulation is cost effective for property owners and tourism. Airbnb and Stayz allows guests to provide feedback. This helps keep property owners honest and provide quality accommodation. This forms a critical part of the self regulation, as guests won’t select properties with negative feedback.

Many properties listed on Stayz or Airbnb are also managed through Real Estates. The only different between self management and using a real estate is the quality of service given to guests.

I support a Code of Conduct which provides a safe framework for property owners. I believe Airbnb offers a great complaints management service and can monitor and report on individual properties.

For stand alone properties, not shared houses, I don’t support any limitations on days or length of stay.

I strongly believe the current system of self regulation works extremely well for my studio property.

Please accept this submission.

Kind regards,

Dianne

I write to make a submission to the New South Wales Governments Short Term Holiday Letting Options Paper.

I do not believe that the same rules should be applied to holiday homes that are being considered for apartments and room sharing in strata properties in the city.

Short-Term-Rental is a key part of the visitor and tourist economy of regional cities and towns. If some of the proposed options are put in place, it could be too burdensome to rent out holiday homes. If this happens then jobs will be lost and the economy will be starved of much needed tourist income in regional New South Wales.

I urge you to treat holiday homes differently to other short term rental and listen to the voices and concerns of homeowners.

Regards,

Chris O’Brien

Hello,
As one of the many people who have taken advantage of this STHL industry which is extremely well run and self-regulated, I'd like to put forward the case for people like my wife and I that are trying to make some extra money to pay for our very expensive rates. We spent quite a lot of money and time to set up our room which has parking, separate entry and is self-contained and had excellent feedback from guests and as far as I know, no impact on neighbours. If we rented the room full-time there would be way more impact. At the moment it is only occasional guests.
I write this email as there does not seem to be any allowance for Air BnB or Stayz operators to put their case forward on the submission forms.
With additional state or local govt. regulation the STHL industry would become over-regulated and probably die (unless this is your goal?)
Jeff Vanderwyk

To; Planning NSW;

Cc: Member for Central Coast Liesl Tesch;

I write to make a submission to the New South Wales Governments Short Term Holiday Letting Options Paper.

We have had our holiday property at Boomerang Beach in the Great Lakes region of NSW Mid North Coast for over 17 years and have been providing not only a holiday home for families and friends but an affordable holiday break away for Australians and overseas tourists.

Many of our guests are regulars and have repeatedly stayed many times over the years and others have discovered the region through our web site promotions and advertising, not knowing the area prior to their stay and loving the beaches, National parks, lakes and restaurants and cafes.

The majority of accommodation in the Pacific Palms area is holiday home rentals with only two caravan parks and one motel. Without holiday home rentals, many businesses in the region who rely on tourism would be affected.

A large part of the business sector in regional Australia in holiday destinations are reliant on tourism brought by the availability of affordable accommodation and this also includes the trade sector including builders, plumbers, electricians, cleaners, linen hire companies, furniture retailers, home wares suppliers, caterers, boat and surf board hire, cooking and surf schools, cafes & restaurants etc.

I understand that some on online web sites have opened up rooms and apartments in built up residential city areas to short term accommodation and there have been complaints but this is not reflective of the short term holiday rental industry in regional areas where people escape for a holiday break away from their working lives.

I do not believe that the same rules should be applied to holiday homes that are being considered for apartments and room sharing in strata properties in the city.

Short-Term-Rental is a key part of the visitor and tourist economy of regional cities and towns. If some of the proposed options are put in place, it could be too burdensome to rent out holiday homes. The rent we earn is a lot at peak times but then most of the year it is empty yet we still have rates, electricity, water etc. to pay. It's hard to make money on a holiday rental....please don't make it even harder.

Kind Regards
Jenny Bell
0725
Dear Sir/Madam

My wife and I have occasionally rented 1 and sometimes 2 rooms in our 4 bedroom home since 2012 as we are retired and our children have left home (occasionally returning for short periods). In 2015 we discovered we needed approval to do this so we commenced the formal approval process with the City of Canada Bay. Attached is information provided with that application that outlines the (very low) level of use, the lack of neighbourhood and environmental impact, and the approval received from our Community Association.

Ultimately we did not proceed with the application because we discovered it would have required a formal report from a fire safety professional which was quoted to be in the vicinity of $4000 despite the fact that our type of STHL is a “permitted” activity in the R3 zone in Canada Bay. The cost of this report seemed excessive when added to the cost of submitting the DA and compared to the relatively little income we were making from the activity. Also I discovered that the NSW Government had set up a committee to thoroughly examine the issue with recommendations due in October 2016. So we decided to wait for this process to be completed. We did not make any submission to that Committee examining the issue.

I was happy to read in the Committee’s report that “STRA is generally operating successfully and generating a low level of complaints ......” because this was our experience. I was also heartened to read that “The Committee recommends that short term letting of rooms in any property where the landlord or host is present be permitted as an exempt development” (Recommendation 2). This was our situation.

However I was then dismayed to find that rather than accept the Committee’s well researched recommendations, there was to be a further Consultation Process. I cannot understand why a Government Committee is set up to conduct an extensive review of any issue only to have its recommendations ignored! All this does is to provide active, well organised lobby groups another opportunity to affect the outcome. This is why I felt I should make a contribution to this Consultation process, to represent people like us.

My wife and I are part of the large majority of people who have up to now operated STHL with zero complaints ...... without the need for any regulation. I am sure there are instances where STHL does cause disruption to a neighbourhoods and I agree that those with legitimate issues should have an avenue for action. However if the (normally silent) majority are using their own homes and property responsibly, and considerately, there is no argument for introducing the expense and time required in a formal approval processes. The Government’s own Committee initially reviewing this activity has reported “STRA is generally operating successfully and generating a low level of complaints ......”. Given this was the conclusion after an extensive review of the facts it is hard to understand why special interest groups (that have probably already provided input to the original Committee) are being given another opportunity to influence the final outcome.

We therefore argue strongly for adoption of all of the recommendations contained in the Legislative Assembly Committee on Environment and Planning’s original report (“Adequacy of the Regulation of Short-Term Holiday Letting in New South Wales”).

Thank you for considering this input

Sincerely

Barry & Bev West

I am writing as a member of the public concerned about the NSW government’s proposals to overregulate Short-Term Home Lending (STHL) and the adverse impacts of these proposals on holidaying families, businesses, home owners, consumer choice, jobs, innovation and the tourist economy of New South Wales.

The STHL sector has contributed significantly to the tourism sector and tourist economy in recent years, buoyed by the growth of the ‘sharing economy’ and its innovative platforms.

STHL has a longstanding history in Australia since the 1900s and these platforms have simply made the process more efficient and transparent. As a result, they have allowed Australian families to supplement their household income while attracting tourists from all over the world to New South Wales and creating 40,823 Full-time jobs for Australians. Half of these fall within the regional economy where accommodation options have traditionally been limited. These platforms should be encouraged and facilitated as part of the government’s innovation agenda – not undermined.

I am concerned that heavy handed or punitive measures such as new taxes, draconian limits on how long a family can lend their home, mandatory development consent or a licensing regime telling Australians what they can or can’t do with their own home will only hurt the sector, cost jobs and harm businesses while driving tourists to other states and impinging upon private property rights.

Home lenders already pay income tax on their STHL earnings and innovative online platforms only make these earnings more transparent.

I believe that preventing the lending of secondary homes is also undesirable. When this measure was introduced in Berlin, Germany, it lead to a sharp drop in available STHL accommodation, a reduction in government income tax revenue as well as a significant increase in the prices of available accommodation – taking money out of visitors’ pockets which could be spent on local businesses. Such a reform would especially wreak havoc in our tourism-dependent regional economy.

If the government or traditional hospitality providers such as hotels are concerned about tax neutrality, the government should instead cut the significant red tape, zoning laws and taxes which burden these establishments – not punish their competitors and competitors’ customers.

I believe that non-coercive measures such as an industry code of conduct or community-focused measures such as allowing Strata associations to create by-laws for STHL accommodation offer a more sensible solution for addressing community concerns without the dire consequences of heavy-handed, anti-innovative options.

I urge you to do the right thing by avoiding any overregulation of the burgeoning and innovative STHL sector.

Thank you for considering my concerns on this vital matter.

Dear Ms Brill
I write to provide feedback on the ‘Options Paper for short-term holiday letting in NSW’, particularly in connection with Strata Properties.

Whilst the Paper, in parts, deals specifically with the unique issues STHL presents for such properties, it seems to assume that these issues and the methods of addressing them are the same for all Strata Properties. They most definitely are not as the following example demonstrates.

My wife and I live in 5 Macquarie Street, Sydney, a building which has numerous balconies overlooking Circular Quay and the Harbour Bridge. As you can no doubt appreciate, this is an extremely popular location to view the celebrations on New Year’s Eve and similar occasions. Reflecting this, in the early years after the building was first occupied, some owners let their apartments to third parties for perhaps one or two nights centring around such an occasion ie typical of what is now called STHL. Almost invariably given the location and occasion, these temporary tenants were groups of young people, not families, fuelled by alcohol and drugs. The results were disastrous. Throwing lighted fireworks into the packed crowd on the promenade on the eastern side of Circular Quay below, many of them children, was commonplace and even empty bottles were sometimes deliberately dropped from balconies 8 or 9 levels above ground level. The Police were of course called on several occasions but by the time they made their way through the crowds the perpetrators had retreated to inside the apartment and typically neither they nor the apartment they were occupying could be positively identified. In the end, after several such incidents, the Owners Corporation strengthened the provision in our By-laws preventing short term lettings (a provision imposed as a condition of Development Consent) and the troubles ceased. Fortunately, whilst there were several minor injuries, no-one was seriously hurt but with bottles raining down from 8 levels above, this was simply good luck, not good management, and without the By-law preventing short term lettings, it was only going to be a matter of time before someone was hospitalised or worse.

Clearly, these problems arose simply because of the unique location of our building. It is inconceivable that similar problems would arise in a small, low-rise Strata Property in a quiet suburban street. In other words, the ‘one-size-fits-all’ approach inherent in the Paper is impractical and instead provisions are required in any resultant legislation to deal with unique situations such as ours. The Paper on page 16 states that “[t]he Grattan Institute advocated giving owners’ corporations more power to limit the impacts of STHL” and “the Committee .... recommended that the NSW Government consider amendments to strata laws to give owners’ corporations additional powers.” On the same page, it then sets out examples of what such amendments and additional powers might comprise. These suggested amendments offer remedies which are firstly, after the event not before so are a punishment not a preventative, and secondly, depend for their effectiveness on being able to positively identify the offender which in our case, as described above, we were not. They therefore simply won’t work in our circumstances.

Our only means of stopping our problem was a By-law preventing short term lettings. If this is unavailable then I have little doubt that the errant behaviour described above will return and this time we may not be so lucky. I therefore urge the Government to retain the provision giving an owners’ corporation the right to adopt By-laws preventing short term lettings when the unique circumstances of that owners’ corporation justify it. Put bluntly, public safety in Circular Quay on NYE far outweighs any benefits to tourism or employment from STHL, should such exist.

If, despite the above, the Government proceeds to effectively ban By-laws preventing short term lettings and the behaviour described above returns with consequent serious injury or death then our Owners Corporation retains the right to produce this letter in any resultant legal proceedings.

Yours sincerely

I strongly believe in the right of people to share their houses and apartments across New South Wales in a responsible and respectful way, without extreme regulations like caps and costly registration processes. Please accept this as a formal submission to the Options Paper.

Why do I host with Airbnb?

The Airbnb host community depends on hosting as an economic lifeline to help us pay the mortgage and the bills. I also recommend my favourite cafes, restaurants and shops so small businesses get a boost from local tourism.

I wish to support the following options:

Section 4: Industry Self Regulation - including industry complaints management and education which encourages responsible hosting and self regulation. Any Code of Conduct would need to be reasonable and representative of the home sharing community.
Section 5: Strata Regulation - This includes options for by-laws to manage visitor behaviour and to receive a revenue share from home sharing. I would also support rules to deal with bad actors and isolated incidents of unruly behaviour. I would not support a regulatory environment which allowed Owners Corporations to ban outright short term rentals.

I wish to register my opposition to the following options:

Section 6: Planning Framework - A planning framework including caps and restrictions would have a negative impact on home sharing. The planning frameworks in both South Australia and Tasmania don’t include any caps on nights at all.
Section 7: Registration or Licensing - A registration or licensing system such as fees to share your own home would have a negative impact on home sharing. In South Australia there are no fees and no registration or licensing system, allowing the home sharing economy to thrive. In Tasmania, there is a simple, quick and cost effective self-assessment form, which is only required in limited circumstances - usually for holiday homes or weekenders only.
Section 5: Strata Regulation - By-laws which could prohibit hosts from sharing their own homes would see strata residents treated as second class citizens. Current rules in NSW do not allow by-laws that ban hosts from sharing their own home, and this would be a step backwards for NSW.

To maximise participation in the sharing economy, any regulations should be clear and easy to understand and comply with, and also cost effective for hosts.

I encourage the NSW Government to follow the lead of South Australia and Tasmania, as well as other cities around the world, which have embraced home sharing and are reaping the rewards.

In Tasmania, there is a simple, quick and cost effective self-assessment form, which is only required in limited circumstances - usually for holiday homes or weekenders only.

Section 5: Strata Regulation - By-laws which could prohibit hosts from sharing their own homes would see strata residents treated as second class citizens. Current rules in NSW do not allow by-laws that ban hosts from sharing their own home, and this would be a step backwards for NSW.

To maximise participation in the sharing economy, any regulations should be clear and easy to understand and comply with, and also cost effective for hosts.

I encourage the NSW Government to follow the lead of South Australia and Tasmania, as well as other cities around the world, which have embraced home sharing and are reaping the rewards.

0749
Dear NSW Government,

I strongly believe in the right of people to share their houses and apartments across New South Wales in a responsible and respectful way, without extreme regulations like caps and costly registration processes. Please accept this as a formal submission to the Options Paper.

Why do I host with Airbnb?

The Airbnb host community depends on hosting as an economic lifeline to help us pay the mortgage and the bills. I also recommend my favourite cafes, restaurants and shops so small businesses get a boost from local tourism.

I wish to support the following options:

Section 4: Industry Self Regulation - including industry complaints management and education which encourages responsible hosting and self regulation. Any Code of Conduct would need to be reasonable and representative of the home sharing community.
Section 5: Strata Regulation - This includes options for by-laws to manage visitor behaviour and to receive a revenue share from home sharing. I would also support rules to deal with bad actors and isolated incidents of unruly behaviour. I would not support a regulatory environment which allowed Owners Corporations to ban outright short term rentals.

I wish to register my opposition to the following options:

Section 6: Planning Framework - A planning framework including caps and restrictions would have a negative impact on home sharing. The planning frameworks in both South Australia and Tasmania don’t include any caps on nights at all.
Section 7: Registration or Licensing - A registration or licensing system such as fees to share your own home would have a negative impact on home sharing. In South Australia there are no fees and no registration or licensing system, allowing the home sharing economy to thrive. In Tasmania, there is a simple, quick and cost effective self-assessment form, which is only required in limited circumstances - usually for holiday homes or weekenders only.
Section 5: Strata Regulation - By-laws which could prohibit hosts from sharing their own homes would see strata residents treated as second class citizens. Current rules in NSW do not allow by-laws that ban hosts from sharing their own home, and this would be a step backwards for NSW.

I wish to register my opposition to the following options:

Section 6: Planning Framework - A planning framework including caps and restrictions would have a negative impact on home sharing. The planning frameworks in both South Australia and Tasmania don’t include any caps on nights at all.
Section 7: Registration or Licensing - A registration or licensing system such as fees to share your own home would have a negative impact on home sharing. In South Australia there are no fees and no registration or licensing system, allowing the home sharing economy to thrive. In Tasmania, there is a simple, quick and cost effective self-assessment form, which is only required in limited circumstances - usually for holiday homes or weekenders only.
Section 5: Strata Regulation - By-laws which could prohibit hosts from sharing their own homes would see strata residents treated as second class citizens. Current rules in NSW do not allow by-laws that ban hosts from sharing their own home, and this would be a step backwards for NSW.

To maximise participation in the sharing economy, any regulations should be clear and easy to understand and comply with, and also cost effective for hosts.

I encourage the NSW Government to follow the lead of South Australia and Tasmania, as well as other cities around the world, which have embraced home sharing and are reaping the rewards.

It affordability

Dear NSW Government,

I strongly believe in the right of people to share their houses and apartments across New South Wales in a responsible and respectful way, without extreme regulations like caps and costly registration processes. Please accept this as a formal submission to the Options Paper.

Why do I host with Airbnb?

The Airbnb host community depends on hosting as an economic lifeline to help us pay the mortgage and the bills. I also recommend my favourite cafes, restaurants and shops so small businesses get a boost from local tourism.

I wish to support the following options:

**Section 4: Industry Self Regulation** - including industry complaints management and education which encourages responsible hosting and self regulation. Any Code of Conduct would need to be reasonable and representative of the home sharing community.

**Section 5: Strata Regulation** - This includes options for by-laws to manage visitor behaviour and to receive a revenue share from home sharing. I would also support rules to deal with bad actors and isolated incidents of unruly behaviour. I would not support a regulatory environment which allowed Owners Corporations to ban outright short term rentals.

I wish to register my opposition to the following options:

**Section 6: Planning Framework** - A planning framework including caps and restrictions would have a negative impact on home sharing. The planning frameworks in both South Australia and Tasmania don’t include any caps on nights at all.

**Section 7: Registration or Licensing** - A registration or licensing system such as fees to share your own home would have a negative impact on home sharing. In South Australia there are no fees and no registration or licensing system, allowing the home sharing economy to thrive. In Tasmania, there is a simple, quick and cost effective self-assessment form, which is only required in limited circumstances - usually for holiday homes or weekenders only.

The Airbnb host community depends on hosting as an economic lifeline to help us pay the mortgage and the bills. I also recommend my favourite cafes, restaurants and shops so small businesses get a boost from local tourism.

I wish to support the following options:

Section 4: Industry Self Regulation - including industry complaints management and education which encourages responsible hosting and self regulation. Any Code of Conduct would need to be reasonable and representative of the home sharing community.
Section 5: Strata Regulation - This includes options for by-laws to manage visitor behaviour and to receive a revenue share from home sharing. I would also support rules to deal with bad actors and isolated incidents of unruly behaviour. I would not support a regulatory environment which allowed Owners Corporations to ban outright short term rentals.

I wish to register my opposition to the following options:

Section 6: Planning Framework - A planning framework including caps and restrictions would have a negative impact on home sharing. The planning frameworks in both South Australia and Tasmania don’t include any caps on nights at all.
Section 7: Registration or Licensing - A registration or licensing system such as fees to share your own home would have a negative impact on home sharing. In South Australia there are no fees and no registration or licensing system, allowing the home sharing economy to thrive. In Tasmania, there is a simple, quick and cost effective self-assessment form, which is only required in limited circumstances - usually for holiday homes or weekenders only.
Section 5: Strata Regulation - By-laws which could prohibit hosts from sharing their own homes would see strata residents treated as second class citizens. Current rules in NSW do not allow by-laws that ban hosts from sharing their own home, and this would be a step backwards for NSW.

To maximise participation in the sharing economy, any regulations should be clear and easy to understand and comply with, and also cost effective for hosts.

I encourage the NSW Government to follow the lead of South Australia and Tasmania, as well as other cities around the world, which have embraced home sharing and are reaping the rewards.

Sophie Butcher

Section 5: Strata Regulation - By-laws which could prohibit hosts from sharing their own homes would see strata residents treated as second class citizens. Current rules in NSW do not allow by-laws that ban hosts from sharing their own home, and this would be a step backwards for NSW.

To maximise participation in the sharing economy, any regulations should be clear and easy to understand and comply with, and also cost effective for hosts.

I encourage the NSW Government to follow the lead of South Australia and Tasmania, as well as other cities around the world, which have embraced home sharing and are reaping the rewards.

Dear NSW Government,

I strongly believe in the right of people to share their houses and apartments across New South Wales in a responsible and respectful way, without extreme regulations like caps and costly registration processes. Please accept this as a formal submission to the Options Paper.

Why do I host with Airbnb?

The Airbnb host community depends on hosting as an economic lifeline to help us pay the mortgage and the bills. I also recommend my favourite cafes, restaurants and shops so small businesses get a boost from local tourism.

I wish to support the following options:

Section 4: Industry Self Regulation - including industry complaints management and education which encourages responsible hosting and self regulation. Any Code of Conduct would need to be reasonable and representative of the home sharing community.
Section 5: Strata Regulation - This includes options for by-laws to manage visitor behaviour and to receive a revenue share from home sharing. I would also support rules to deal with bad actors and isolated incidents of unruly behaviour. I would not support a regulatory environment which allowed Owners Corporations to ban outright short term rentals.

I wish to register my opposition to the following options:

Section 6: Planning Framework - A planning framework including caps and restrictions would have a negative impact on home sharing. The planning frameworks in both South Australia and Tasmania don’t include any caps on nights at all.
Section 7: Registration or Licensing - A registration or licensing system such as fees to share your own home would have a negative impact on home sharing. In South Australia there are no fees and no registration or licensing system, allowing the home sharing economy to thrive. In Tasmania, there is a simple, quick and cost effective self-assessment form, which is only required in limited circumstances - usually for holiday homes or weekenders only.
Section 5: Strata Regulation - By-laws which could prohibit hosts from sharing their own homes would see strata residents treated as second class citizens. Current rules in NSW do not allow by-laws that ban hosts from sharing their own home, and this would be a step backwards for NSW.

To maximise participation in the sharing economy, any regulations should be clear and easy to understand and comply with, and also cost effective for hosts.

I encourage the NSW Government to follow the lead of South Australia and Tasmania, as well as other cities around the world, which have embraced home sharing and are reaping the rewards.
